**Call to write and publish a review for QMiP Bulletin:**

Special Section on Open Science, Qualitative Methods and Social Psychology: Possibilities and Tensions

Call for Expressions of Interest to write and publish a review of the following special section of the British Journal of Social Psychology: ***Open Science, Qualitative Methods and Social Psychology: Possibilities and Tensions[1]***. The review will be published in the Spring 2025 issue of the *QMiP Bulletin*.

As the introductory editorial of this special section notes, "In recent years, there has been a focus in social psychology on efforts to improve the robustness, rigour, transparency and openness of psychological research. This has led to a plethora of new tools, practices and initiatives that each aim to combat questionable research practices and improve the credibility of social psychological scholarship. However, the majority of these efforts derive from quantitative, deductive, hypothesis-testing methodologies, and there has been a notable lack of in-depth exploration about what the tools, practices and values may mean for research that uses *qualitative* methodologies. Here, we introduce a Special Section of BJSP: *Open Science, Qualitative Methods and Social Psychology: Possibilities and Tensions.* The authors critically discuss a range of issues, including authorship, data sharing and broader research practices. Taken together, these papers urge the discipline to carefully consider the ontological, epistemological and methodological underpinnings of efforts to improve psychological science, and advocate for a critical appreciation of how mainstream open science discourse may (or may not) be compatible with the goals of qualitative research" (Pownall et al., 2023, p.1581).

The *QMiP Bulletin* are calling for an author or team of authors to review this special section and share their reflections on the next steps for qualitative research and Open Science. The author or team of authors will receive £125 in Amazon vouchers as a thank you for their contribution.

This review article will be published under the 'Brief Reports' section of the *QMiP Bulletin,* with an expected word count of 2,000-4,000 words, excluding Abstract, key words, and References.

---

3-5 key words should be included, and the Abstract should be 150-200 words. Authors are asked to read the journal's submission guidelines carefully, which can be found here: https://explore.bps.org.uk/content/bpsqmip

Process of selection

Stage 1: Call for Expressions of Interest

Interested author/team of authors are invited to send an Expression of Interest (300-500 words) to Eva Fragkiadaki (qmipbulletin@outlook.com) by 27th September 2024.

Submitted Expressions of Interest will be reviewed by the editorial team to come up with a final selection. Notification of outcome will be received by 18th October 2024.

Stage 2: Submission of review following acceptance of Expression of Interest

The author/team of authors of the accepted Expression of Interest will be invited to submit their review article by 6th December 2024. The submitted review will undergo review by the editorial team. Authors/team of authors will be notified about any revisions required by 31st January 2025, and the final version of the review article is to be submitted by the 28th February 2025.

After the final acceptance of the review article, the Amazon voucher codes will be sent by the Editor.

Timeline

Expression of Interest deadline	27th September 2024
Notification of outcome	18th October
Submission deadline of review article	6th December 2024
Feedback returned to author/team of authors	31st January 2025
Submission deadline of final version	28th February 2025
Amazon vouchers sent	March 2025
